

NO CASTA DAY

National Day of Protest against
lobby and corporations

Italy, September 8, 2015

#NoCastaDay

The economy of our country is growing very slowly.

The elevated youth unemployment rate, the absence of new opportunities and the fences to the free competition of knowledge has determined an interdiction to the social lift.

The reasons of the economic stagnation are many, but surely there is an excessive weight of lobbies and corporations.

Too much is the influence of the strategic and political choices and we believe that this will damage the youth and the consumers. There is too much priority given to particular interests causing damages to the general ones.

CHANGE IS POSSIBLE. WE HAVE TO CHANGE

We ask Government and Parliament to change the course, starting with the text that is now being discussed in Parliament on the competition theme, supporting the free comparison of the ability in the drug's distribution area and in the legal services one with the possibility to build an interdisciplinary society.

We also ask the launching of a law that regulates the lobbying activity in Parliament and severe sanctions for the professional Orders that cunningly limits the competition between their own members.

We ask the Government and the Parliament to give everyone equal opportunities to build their own future without corporate bonds.
